## Short Takes, By George McClellan Jobs and our Economy

First, let us accept a now undeniable premise: the Democrat Party that exists today is not the Democrat party of John F. Kennedy. It is no longer the counter-balance of competing American political ideals with the Republican party aimed to promote and improve American life. The Democrat Party of today has been completely subverted and taken over by the remnants of the old Communist/Socialists/Marxist whose social and economic philosophies have failed utterly in every country where they have been tried.

If prosperity is the key of security it should be the goal of government at all levels. There can be no prosperity without employment and as have been proven time and again, government does not make jobs. It cannot create wealth therefore it cannot support jobs without a source of income which comes to them as Taxes. Taxes are a double edged sword for government. Take too much and the well dries up. Don't take enough and citizens complain about a lack of services.

But this bunch now running our government have the printing press to make money and create only government jobs and they have the power of the gun to take our wealth from us in any way they want.

The writers of our Constitution, or what's left of it, foresaw the dangers of government to the people. They have scheduled elections for Representatives every two years. Senators, in their time, were selected by the individual States and as such represented the individual states. It was that process that truly made all politics local. Senators are now popularly elected and together with Representatives have fashioned themselves as political elites with high special interest followings to keep them as elites.

As special elites they feel their jobs are now secure (or nearly so) and to keep their jobs they must create a base of the electorate (voters) that will keep them there. Hence, the odious support of business killing labor unions. In order to pay those pledges to unions and other self-interest groups they must somehow, get more money. So, increase taxes.

The Democrat Health Care Plan (Obama-Reid-Pelosi) is nothing more than a tax scheme for power and wealth redistribution. Couple that with the Global Warming hoax and it's clear they want to kill small business and enslave American workers to organized labor (Union's) . These two schemes will eliminate 2/3rd's of Americas work force created by small business.

It's beyond time to get mad. It's time to take action. These people must be thwarted until such time as they can be removed at the ballot box. Get involved. Don't just sit there; Do something! Join your local county political party or even the very active TEA party proponents. But do it! We can no longer ignore the danger facing us. These people are evil and they must go! (09 DEC 09)
