

## Planning for the Future

The perfidy of our Government is now complete. The Socialist Democrats, unable to meet the rising challenge of the American people not to commit to their alleged health care/wealth transfer program, have resorted to criminal bribery to obtain their goal of enslaving Americans to big government. Certain members of the US Senate, whose obligations to the Constitution and all Americans have been thrown to the winds, have identified themselves as the true criminals they really are.

The outright bribery of Senators, Landreau of Louisiana, \$300 Million, Ben Nelson of Nebraska, who was promised that the American tax payers will pony up \$45 million dollars to cover federally mandated health care costs for Nebraska; let us not forget Senator Christopher Dodd of Connecticut, who got us into this mess, obtained a \$100 Million item tucked into the Health care bill for a University building program in his state.

The health care bill, if it indeed becomes law, should be a target rich environment for law suits challenging the Constitutionality of most, if not all, of its provisions. Senator Nelson probably voted himself out of a job come his next re-election, for being the traitor he is. Chris Dodd got the \$100 million to help his lost re-election chances and Mary Landreau will soon be an expensive memory.

What of the future? I support the proposed **Congressional Reform Act of 2009**. Now is absolutely the time for Americans to get behind this effort to move us from the path to socialism where the Democrats are leading us. Many will say that what is proposed will be impossible. It was these same people who said the fall of the Soviet Empire was impossible or that America could become a socialist third world state was impossible.

Here are the proposals: (1) 12 year term limits for House and Senate in either two six year terms, six two year terms or one six year Senate term and three two year House terms. (2) No tenure, no pension. (3) Pay for congressmen only while they are in office. (4) Congress (retroactively) participates in Social Security. All congressional retirement funds will be moved into the Social Security trust fund immediately so Congressmen can participate with the American people. Congress can select their own retirement plans like the rest of us. (5) Congress will no longer vote themselves pay raises. Congressional pay will rise by the lower CPI or 3%. (6) Congress will abandon its current health care plan and share with the American citizens in the same health care system. (7) Congress must abide in all laws they impose on America and (8) All contracts with past and present congressmen are void effective 01/01/10.

This is a work in progress and other ideas are solicited. Our politicians must be constantly reminded that serving in Congress is an honor, not a career. The American voters did not give Congressmen their perks, Congressmen did. We need to take back America. This is where we start. How about Johnny Isakson or Saxby Chambliss stepping up to the plate to get this ball rolling?
